EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Mr. Yoon Ham on 13 March 2006.

3. The following changes were proposed by the telephonic interview:

a. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures.

b. Please amend claim 2 as follows:

The system according to claim 1, wherein the snapshot status information of the mapping entry is a snapshot status bit (SSB) and a first allocation bit (FAB).

Allowable Subject Matter

4. Claims 1,3 and 7 are allowed.

5. The following is a statement of reasons for the indication of allowable subject matter:

As for claim 1, though the mapping table as taught by Lubbers does include physical data block information (col. 11, lines 2-10), it does not include snapshot status information as claimed by applicant.

Additionally for claims 1,3 and 7, the rejection set forth under 35 U.S.C. 112, 2nd paragraph is withdrawn. What constitutes "a large network storage" is understood since Applicant is using this phrase to describe a specific type of large network storage (i.e. SAN), which is well known in the art.
